Tech Requirements

- Speaker prefers to use the audio-visual team computer. If using her computer, she has a 2019 MacBook Air with 2 USB-C ports.
- Head-worn microphone. If not available, let Speaker know in advance.
- Long-range clicker (compatible with MacBook Air if using Speaker's computer)
- A/V projector with HDMI port and HDMI cables
- 2 confidence monitors that show next screen and current screen. Please place at stage level so Speaker can view without breaking audience eye contact.
- Wireless microphones for audience participation with microphone runners, preferred.
- Standard format for slide deck is 16:9 format PPT for Mac.

Room Set Up

- Speaker walks into the audience / brings people on stage. Please create a path from the audience to the stage, preferably stage left & right.
- Speaker prefers an empty stage with only props for the keynote and a small props table (center stage right). If others need a podium, please ensure it is not downstage center.
- Ensure water is available prior to coming on stage and on stage
- Please send a diagram of the room set up prior to arrival.

Accommodations

- Quiet hotel room at conference site, preferred.

Core Team Details

- Speaker likes to get to know your team prior to the event. Please send a list of conference organizers she will be working with (include titles).
- To customize your keynote, Speaker recommends 2 pre-event meetings. Alicia arrives early and is available to meet with the team the day prior.
- If using Speaker's computer, please send slides you will use to introduce her / your conference in advance. She will include these in her slide deck.
- Please schedule a time for Speaker to talk with the tech team prior to arrival.
- Speaker's keynotes require a tech check the day prior. Speaker's keynotes often include choreographed audience participation, requiring pre-event coordination with volunteers and an onsite dress rehearsal.
